Innovation through collaboration

Head and neck cancer involves multiple medical and allied health disciplines. Via collaborative teamwork, we can achieve the best outcomes for our patients.

You are welcome to join us in Queenstown, New Zealand, for the 22nd annual scientific meeting of the ANZHNCs, run in conjunction with NZAPS, to hear presentations from international and local experts in the fields of surgery, oncology, dentistry, immunology and allied health.

We look forward to seeing you there.
