Professor, Department of Otolaryngology and  
Head and Neck Surgery, Graduate School of  
Medicine, The University of Tokyo |
November 27-30, 2019

Late November in Tokyo is one of the most beautiful seasons to visit, see the colorful scenery by nature and artificial lights throughout the city!
The Keio Plaza Hotel Tokyo is the ideal location to explore the delights of the city of Tokyo. Only minutes away from the most popular shopping and entertainment spots in Shinjuku, with stunning views over central Tokyo. It also has easy access to popular tourist locations like Akihabara, Shibuya, Ginza and even Yokohama. There’s really no better location.
**Airport Access**

**From / To Narita International Airport**
- By Airport Limousine Bus
  - Duration: approx. 120 minutes.
- By Narita Express NFX
  - Duration: approx. 81 minutes.

**From / To Haneda Airport**
- By Airport Limousine Bus
  - Duration: approx. 70 minutes.
- By Keikyu Line/ JR Yamanote Line
  - From Haneda Airport, take the Keikyu Line to Shinagawa Station and change trains to the JR Yamanote Line that goes in the direction of Shibuya. Get off at Shinjuku Station. It takes about a 5 minute walk from the west exit of Shinjuku Station to the hotel.

**By Train**
- Shinjuku Station: JR, Tokyo Metro Subway Marunouchi Line, Toei Shinjuku Line, Keio Line and Odakyu Line
- Toei Oedo Line: Tochomae Station

**By Taxi**
- Time required is approximately 45-60 minutes.
- Fare to be around JPY 8,000-12,000.

Call for Papers

Abstract submission opens: April 1 to August 20, 2019 (tentative)

Presentation Style
- Paper
- Paper or poster
- Poster only

Abstract Topics (tentative)
- Cochlear Implantation
- Hearing Aid
- BAHA, Middle ear implant
- Audiology (sensorineural hearing loss, tinnitus, genetics)
- Vestibular implant (electrical stimulation)
- Basic Science
- General Otology and Neuro-otology
- Miscellaneous
Active Middle Ear Implants Revisited
Approach to Asymmetric Hearing Loss in Children
Approach to Late Onset Hearing Loss in Children
Approach to Single Sided Deafness
Art of Hearing: Preservation
Art of Hearing: Regeneration
Auditory Brain Stem Implantation in Adults
Auditory Brain Stem Implantation in Children
Auditory Neuropathy Spectrum Disorder: Decision Making and Results
Bilateral Cochlear Implantation in the Developing Countries: How to Deal with the Approval Process
Bilateral Implantation in Adolescents and Adults. Is It Universally Rational?
Bone Anchored Hearing Aids
Central Auditory Processing Disorders in Children
Challenges in Cochlear Implant Surgery
Changing Deaf Society: Effect of Cochlear Implantation
Cochlear Implant Decision Making in Young Children. Objective Tests vs Behavioural Tests
Cochlear Implant in Adolescence: Consequences for Short- and Long- Term Users
Cochlear Implantation in Children Living in Multicultural and Multilingual Environments
Cochlear Implantation in Chronic Otitis Media Cases
Cochlear Implantation in Elderly
Cochlear Implantation in Far East Asian and Pacific Countries
Cochlear Implantation in Labyrinth Abnormalities
Cochlear Implantation in Multi-Handicapped Children
Cochlear Implantation in Older Children Lacking Oral Language Development
Cochlear Implantation in Post-Meningitic Deafness
Cochlear Implantation in West Asian and African Countries
Ear Canal Atresia: Which Technique Should Be Chosen for Hearing Rehabilitation
Electroacoustic (Hybrid) Stimulation: Long- Term Results
Electroacoustic Stimulation in Children
Family Education
Future of Auditory Implants
Genetic Screening: When and to Whom?
Genetics of Adult Onset Hearing Loss
Hyperacusis and Functional Hearing Loss
Implantable Device Choices for Chronic Otitis Media. When, How and Why?
Intraoperative Electrophysiological Measurements in Auditory Implants
Long- Term Outcomes of Different Rehabilitation Modalities in Bony Labyrinth Abnormalities
Management of Current Peripheral Vestibular Disorders
Management of Intractable Tinnitus
Management of the Facial Nerve in Petrous Bone Lesions
Music Appreciation and Cochlear Implants
Narrow Internal Auditory Canal: Cochlear Implant vs Brainstem Implant
New Fitting Modalities in Cochlear Implantation: Surgical and Audiological Considerations
Novel Technologies in Cochlear Implantation
Pre-Implant Rehabilitation
Psychosocial Development of Children Implanted at Young Ages
Radiological Evaluation for Auditory Implants
Rationale of Bilateral Implantation in Children
Revision Surgery and Reimplantation
Single Sided Deafness in Children
Speech Development of the Implanteé
Subjective Tinnitus
Surgical Approaches to Lateral Skull Base and Cerebello Pontine Angle
Surgical Complications of Cochlear Implantation
